

CR200

Platinum Wall Combi-rail

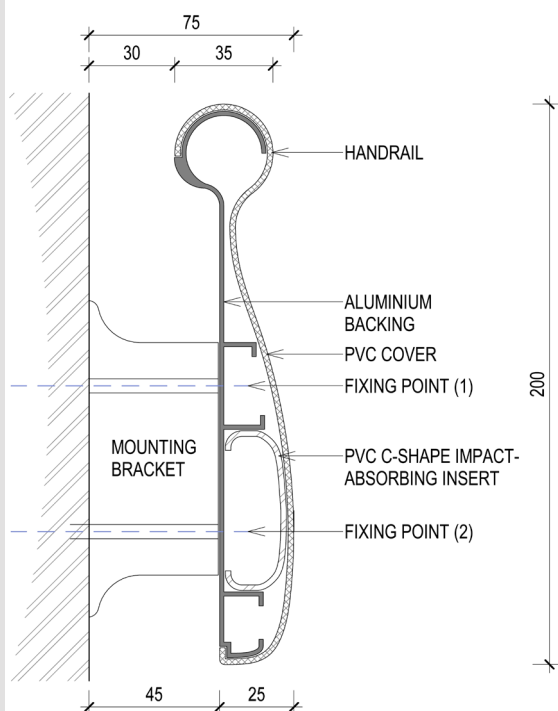

The Platinum Wall Combi-Rail combines a handrail and wall guard element in a single profile providing high performance, impact and abrasion resistance for buildings where durability and impact resistance are important. The Combi-Rail's sleek profile is designed not only to protect walls but also offers a comfortable grip and safeguards the people from slipping or falling.

The CR200 is a modular system constructed of a heavy gauge aluminium retainer, a C-shaped PVC insert for extra strength and impact absorption, a PVC covering, PVC accessories including brackets, end-caps, outside corners and joining strips for applications exceeding 3m lengths.

FEATURES

Height	200mm
Length	3m
Depth	75mm (including bracket)
